

Valorising residual biomass in food supply chain

Webinar (Zoom) 2 June 2022

at 9:00–12:00 in Finland (UTC +3), 14:00–17:00 in China (UTC +8)

Organized by Finland-China Network in Food and Health (FCFH,
<https://fcfh.utu.fi/>) and University of Helsinki (<https://www.helsinki.fi/en>)

PROGRAMME

9:00 – 9:05

Opening

Prof. Marina Heinonen
University of Helsinki

9:05 – 9:40

Gentle food processing for better sustainability

Prof. Remko Boom
Wageningen University & Research

9:40 – 10:15

Bioactive compounds from food processing side streams and their activities

Assoc. Prof. Jing Zhao
China Agricultural University

10:15 – 10:30

Break

10:30 – 10:45

Novel food safety assessment of side streams

Prof. Marina Heinonen
University of Helsinki

10:45 – 11:00

Multifunctional edible films for food packaging

Prof. Fang Zhong
Jiangnan University

11:00 – 11:15

Smart utilization of industrial side streams makes food chain sustainable – case studies

Dr. Annukka Pakarinen
Häme University of Applied Sciences

11:15 – 11:30

Towards efficient anaerobic digestion – manure to energy and other bioproducts

Prof. Mika Ruusunen
University of Oulu

11:30 – 11:55

General discussion

All participants

11:55 – 12:00

Closing

Prof. Marina Heinonen

Register by 30.5.2022 via this link.

Zoom link to webinar will be sent to registered participants after the registration has closed. Webinar is free of charge and open to all.
